#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03/26/07 has been entered.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2 and 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Ferrante et al. (USPN 5,176,684).

3. Ferrante discloses a medical bur for cutting bone comprising a handle; a shaft (64); a bur head (22) having a cutting portion (68), and a stop portion (66) along the shaft that is fixed with respect to the cutting portion. The bearing sleeve (66) acts as a stop in that it will stop the bur when the bearing sleeve reaches the end of the guide channel (22). The cutting portion is located between the handle and the stop portion and exhibits symmetry about its longitudinal axis, which is aligned with the longitudinal

axis of the shaft. The stop is located at a terminal end of the shaft, where the definition of *at* is "in, on, or near". The stop portion is spaced from the cutting portion to permit independent movement of the cutting portion with respect to the stop portion (Col 5, line 24). The cutting portion rotates under power to cut through bone while the stop portion rotates freely and is *capable* of preventing contact of the cutting portion with soft tissue located adjacent the bone being cut. The proximal edge of the stop portion corresponds to the size and shape of the distal edge of the cutting portion. The bur head is spherical and the stop portion is shaped as a portion of the sphere.

#### ***Response to Arguments***

4. Applicant's arguments filed 03/26/07 have been fully considered but they are not persuasive. Applicant has tried to amend over the prior art by locating the shaft "at" the terminal end of the shaft. However, "at" is defined as "in, on or near" (*Dictionary.com Unabridged* (v 1.1). Retrieved July 04, 2007, from *Dictionary.com* website: <http://dictionary.reference.com/browse/at>) In light of this definition, it is clear that Ferrante still anticipates the claim. Furthermore, comparison of Figures 4 and 5, as well as figure 5 from Ferrante (USPN 5,098,436), examiner asserts that at the very least, the feature would be a matter of design choice.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth Houston whose telephone number is 571-272-7134. The examiner can normally be reached on M-F 9:00-5:30.
